

REMARKS

The specification has been amended by capitalizing various product names. (The Examiner is respectfully requested to maintain the original underlining in the paragraph beginning at page 54, line 11.) Applicants do not represent that these names are trademarks, nor do Applicants represent that any product names that may inadvertently not have been capitalized are not trademarks. The amendment has been made simply to advance the prosecution herein, since Applicants continue to traverse the Examiner's requirement regarding capitalization of trademarks, for the reasons already stated of record. Applicants also respectfully submit that the added burden placed on Applicants to make this amendment is not compensated by any commensurate benefit to the public.

Applicants continue to urge that the present claims are patentable for reasons discussed in the above-referenced amendment.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
